About This Content

An iconic race from Master of Orion II has returned to conquer the stars!

The eldritch Trilarian join the original 10 races with their own emperors and advisors, new ship hulls and blueprints, and unique perks and personalities. The whole galaxy welcomes their arrival, just in time to face the return of the nefarious Antarans.

In the depths of the other-worldly oceans of Trilar, the Trilarian Shoal is governed by the Stinger, half-dictator and half-messianic figure. His tentacled subjects worship old gods fashioned around folk tales and cryptic mythology, whose darker undertones clash with their overall friendly disposition towards other races. They are generally willing to coexist with other races and rarely seek out open conflict, but they are capable of quickly turning face when they believe it is the will of their deities to do so.

master of orion trilarian shoal

Cute point and click game, like a second-string Monkey Island with dogs. Generally funny, with some surprisingly mature humor. Also contains a very humane hint system that means you won't get frustrated.

Not a pinnacle of the genre or anything, but enjoyable.. Doodle God is an engaging way to while away the time while listening to a podcast or music. Beginning with four elements, you must discover combinations to build your way from Earth, Air, Water, and Fire to Magic and Technology. The later elements are somewhat difficult to devine, as you are not instructed what you're trying to create. It can lead to repeated mindless clicking as you try to combine any and all elements available to you. Nevertheless, it kept my interest long enough to work at completing the game, and some of the unexpected results of element combination were quite amusing.. 3/10 zzzzzzZ

Got it in a bundle and lost interest after 10 minutes. Maybe it's because I own a dozen 1000 pcs puzzles that I have each done a couple of times with the family. The sidegame is a distraction, not an enhancement.. Best game 2016. **Made by the developers of Bad Rats, need I say more?**

This game is bad. Really bad. The gameplay is repetitive and boring, even before the end of the first level I wanted to stop playing. The voice acting is the worst I've heard, the music is a short 30 second loop, the fire sound is awful and since this is a space shooter you'll hear it A LOT. Visually the foreground and background objects feel like they are drawn for two entirely different games (they don't mesh well) and are hard to look at.

I'm sad that I even installed this game, in the end I found no enjoyment. If this review saves you from experiencing this terrible title then I have succeeded.. everyone kicks me out and i just started >:(. this game is really fun and easy to pick up. i have never spraypainted myself but still i could make some nice art. its fun looks nice runs good and is easy to pick up. if you have vr i would totally recomended. very nice graphic design. good game.

Charlemagne, Charlie, my boi, my man. Why do you have to be so cute.. Puzzles: 8/10

Story: 6/10

Characters: 2/10

Ambience: 6/10

Scare Factor: 8/10

Overall Experience: 6/10

I played a lot of Nancy Drew when I was 14. If this game had existed back then, I would have DIED of fear. From my experience, this is the scariest ND game so far. Full of fun puzzles, though some seem very meaningless and unrelated to the plot. Biggest complaint was the characters, all of which were extremely annoying. The fact that a Japanese family spoke exclusively seamless, fluent English with one another was extremely unbelievable, and I resent that Her Interactive asks players to ignore it. Dear Her Interactive: stay in the States... and stick to the original, Carolyn Keene stories!

TL;DR: Recommended for ND fans who love puzzles and/or horror movies. Not recommended for ND fans that love story and ambience.. ok , so i played through a whole season in Dirt cars , games good , not great. really the only thing that's changed from Nascar Heat 2 to NH3 is a few added trackes , Dirt cars , and a Revamped Rivals system .

If you really need to buy this , wait for a sale , but i guess all in all it's not a bad game , it's improved a lil bit since that Abortion they made last year.

Is it worth a buy ---- Yes , but on sale. Brought here by the lure of my cardboard One Deck Dungeon... I tried this iteration and it is amazing. The game runs smoothly and while my dice roll onesies and twosies more often than nought... well I think this is a very well presented game.

This might be a weird thing to say but if you've thought about buying a physical copy of the game but you're a bit intimidated by the unknown... this is the way to go as a gateway to another realm of enjoyment. Your electronic copy allows solitaire play and gives you an excellent feel for what it'd be like to play the real thing without any fumbling with rules or trying to find where the last black die rolled when it skidded off the table.

Don't hesitate... buy this... enjoy it and pass on the enjoyment to someone else when you do.. Worst discord mod ever ---> Bad community. Literally the community will ruin your gaming experience. Some how people can't accept the fact that I beat one of the highest rank player ONCE. And I specifically said once but, I guess it's too much for them to take. IDK what's the big deal about it.. Art of Gravity is a fun, quick, but not heart pounding challenging puzzle game for a very cheap price well worth more than what it's priced at. I do recommend and I'm not really a puzzle playing guy.. I think this is a good one. I like tower defense games so I figured I'd like this but there are quite a few unique things for this one.

Pros:

Lighthearted (Tries it's best to be ridiculous with it's dialog)

Crazy (The turrets talk, your main currency to buy things is strawberries, the main character looks like a toilet with the basket on its back)

Small, this game seriously only takes up 800 MB or something at the time of writing this.

Multiplayer, always nice to play with friends.

Cons:

Short (I haven't finished it yet and haven't tried the challenges but for the regular maps I think I'm already half way done.)

Character customization seems to be disabled at the moment, you can interact with paint cans to change your color but not much else.

On a random note you fight using the turrets by attaching one to your head, this makes you a mobile defense base more than it gives you a weapon though, you can command nearby towers to shoot a given place anyway and the one on your back is no different, it'll also shoot automatically when you're not commanding it. It's a bit different and doesn't make a huge difference but I found it a bit of a strange system at first.

Definitely worth a look if you're into coop tower defense type games.. Tower defense with fog, and bonus challenge maps. Terrible acting, pretty graphics, you know, we've seen it all before.
